# 2nd International Conference on Machine Learning, Security and Cloud Computing (ICMLSC2020)

## Round-2

## Accepted papers

| sl no | Title of the paper |
|-------|-------------------|
| 1 | Adaptive Symbiotic Organisms search technique for cost optimization of shell and tube heat exchanger |
| 2 | Comparative analysis of two-zone intelligent protection algorithms of generator-transformer unit |
| 3 | WSN Smart Irrigation System and Weather Report System |
| 4 | A contingent review on cloud computing trends predicting viable possibilities for future of computing |
| 5 | Improved accuracy of pest detection using augmentation approach with Faster R-CNN |
| 6 | A Survey of Machine Learning Techniques Used on Indian Stock Market |
| 7 | Performance Analysis of Activation Functions for Wheat Crop Yield Prediction |
| 8 | Visualization of Real World Enterprise Data using Python Django Framework |
| 9 | INTELLIGENT TRAVEL ROUTE SUGGESTION SYSTEM BASED ON PATTERN OF TRAVEL AND DIFFICULTIES |
| 10 | Reconstruction of Gene Regulatory Network using Bayesian Network |
| 11 | Key Value Combination for Scholarship Disbursal Analysis through Map-Reduce |
| 12 | A survey on Pose Estimation using Deep Convolutional Neural Networks. |
| 13 | Human Action Recognition Using A Novel Deep Learning Approach |
| 14 | Deep learning architectures for semantic segmentation of 2D image: A review |
| 15 | Survey on: Applications of Smart Wearable Technology in Health Insurance |
| 16 | Usage of time series forecasting model in Supply chain sales prediction |
| 17 | Novel techniques of For Time Series – Decomposition For Supply chain sales prediction |
| 18 | Human Action Recognition Using A Novel Deep Learning Approach |
